

## Intermediate/Senior Full Stack Developer

### About ROK Software

ROK Software provides valuable software solutions and project acceleration to solve our customer's needs and accelerate their development roadmap. We provide services in two broad categories: enterprise software and software in a hardware environment.

We think and act "bigger picture". We understand our customer's needs starting with their business needs and landscape, product roadmap and technical landscape, so we can do our part towards helping them achieve business success and deliver maximum value.

ROK encourages initiative and provides a supportive, collaborative environment where we are often exposed to new business domains and technical landscape. We support flex time, flex location and work-life balance.

If these things resonate with you, please get in touch! We want to hear from you.

### Job Description

- Understand the business domain and customers' needs in order to provide the right solution
- Collaborate in cross-functional teams to drive the project from idea to innovation to implementation and beyond
- Architect solutions that offer scalability, maintainability, flexibility, and responsiveness
